

Water Heaters & Heat Exchangers

Cole Industrial, Inc. carries a complete line of propane and fuel oil systems from some of the leading manufacturers in the industry. For more information on our fine line of products, please contact us.

AQUA-CHEM

Leader in evaporation and reverse osmosis technologies and water pretreatment equipment. In addition, Aqua-Chem also provides a full array of engineering, manufacturing, installation, training and maintenance services and more.

HARSCO INDUSTRIAL PATTERSON-KELLEY

Manufacturer of copper fin tube heating boilers and domestic water heaters. Boiler comes completely packaged, including burner and controls, in sizes ranging from 595 MBTU - 1,7000 MBTU output with up to 88% thermal efficiency. Semi-instantaneous and tank type water heaters for potable and production applications.

PAUL MUELLER COMPANY

High efficiency heat transfer performance utilizing plate and frame and template heat exchangers. Adapting traditional shell-and-tube design by using Mueller's unique Temp-Plate heat transfer surface instead of tubes, providing a highly efficient, welded heat exchanger with easily accessible interior, low fouling potential, and resistance to plugging.

CANNON BOILER WORKS

Turning wasted heat into valuable energy, Cannon manufactures flue gas economizers custom-designed for optimum heat recovery on steam boilers of 2,000 - 250,000 #/hr rating. Designed for gas, oil or coal-fired boilers or for a special waste gas stream. Can engineer metallurgical combinations for special applications with more corrosive flue gases.

PENN SEPARATOR

Manufacturer of blowdown separators, blowdown tanks and blowdown heat recovery systems for removing water from steam and other vapors, safely handling blowdown and controlling thermal pollution. Heat recovery systems for small to large boilers can provide up to 90% heat recovery.

ERI

Manufacturers of heat recovery systems and steam generators.
