

Service

Service Technicians

At Cole Industrial, Inc. our factory-trained field service techs are the best in the industry, specializing in boiler combustion service and boiler pressure vessel repair. Serving Washington, Oregon, Alaska, and Northern Idaho, we offer 24-hour service.

Boiler Makers

Cole Industrial is certified with the "PP" Power Piping Stamp by the American Society of Mechanical Engineers (ASME) and with the "R" Stamp by the National Board of Inspection Code (NB) for making pressure vessel repairs and alterations.

Training

We offer professional Boiler Systems Training Programs and Seminars to our customers at various locations throughout the NW. The two-day seminars include training by an expert staff in a variety of areas.

Annual Service Contracts

Cole offers annual service contracts to make sure your equipment is operating at peak efficiency.

ASME Testing

Startup, testing and boiler tuning are essential to assure its operation conforms with the manufacturer's design and customer-specified parameters. Our services include testing for: emissions, ASME PTC4.1 efficiency, control and

monitoring systems, normal operating and safety limits testing.
