

## Boilers

Cole Industrial, Inc. carries a complete line of Firetube (steam & hot water), Industrial Watertube, Commercial Watertube, Copper Watertube, Electric, Solid Fuel, HRSG, and Condensing boilers from some of the leading manufacturers in the industry. For more information on any of our product lines, please contact us.

### CLEAVER-BROOKS

Pioneer, originator and world's largest manufacturer of steam and hot water packaged boilers and boiler room equipment, including firetube from 15hp - 1500hp (518 lbs/hr - 51,750 lbs/hr), commercial and industrial watertube from 1,237 lbs/hr - 151,700 lbs/hr and electric boilers from 9kw - 3,375kw. Also manufactures deaerators, economizers, blowdown systems, water treatment equipment, burners and stacks.

### NEBRASKA BOILER COMPANY

In business since 1946, manufacturer of industrial watertube type boilers from 5,000 #/hr to 275,000 #/hr and 150 to 1500 psig design pressure, steam temperatures to 1050°F in D-, A-, and O-type design. Full range of packaged, modular, or field-erected heat recovery steam generators (HRSGs) and waste heat boilers.

## HARSCO INDUSTRIAL PATTERSON-KELLEY

Manufacturer of copper fin tube heating boilers and domestic water heaters. Boiler comes completely packaged, including burner and controls, in sizes ranging from 595 MBTU - 1,7000 MBTU output, with up to 88% thermal efficiency. Semi-instantaneous and tank type water heaters for potable and production applications.

## SUSSMAN ELECTRIC BOILERS

Manufactures a variety of electric boilers and auxiliary equipment, standard construction as well as special materials. Specialized in applications from 6kw to 5000kw, steam and hot water. Applications: laboratories, brewing and baking industries, steam cleaning. Also manufactures electric steam superheaters.

## FULTON

Manufacturer of Pulse combustion condensing boilers, vertical boilers, and support equipment. Pulse technology offers small footprint, simplicity of operation, and lowest maintenance requirements in the industry with efficiencies up to 90% and sizes from 500 MBTU to 2,000 MBTU/hr. Vertical boilers come in steam or hot water, sizes from 4 HP to 130 HP, and both standard and high efficiency models.

## RITE ENGINEERING & MANUFACTURING

Manufacturer of horizontal watertube packaged boiler systems for steam and hot water applications with lower costs, high efficiency and simple maintenance. Gas fired, oil fired or combination with a range of 480,000 - 12,500,00 btu/hr input.
