

Boiler Sales Tech

Cole Industrial, Inc. is seeking a qualified BOILER SALES ENGINEER to join our successful Portland team. We specialize in leading edge products that are designed for high efficiency and ultra low emission applications including: steam boilers, condensing hot water boilers, combustion burners, advanced boiler control systems, energy heat recovery equipment, and steam plant auxiliary equipment.

What you need:

- At least 3 years of experience with boiler systems, HVAC systems, combustion technologies, or mechanical systems
- Bachelor degree
- Thorough technical knowledge of boiler or mechanical system applications
- Sales experience
- Strong written communication skills as well as experience writing detailed proposals
- Team player mentality
- Self-sufficient attitude

What you'll be doing:

- Equipment / system sizing and selection
- Customer site reviews and economic analysis
- Technical presentations for customers and accounts
- Preparing proposals for customer presentations
- Traveling to boiler plants throughout Oregon and SW Washington

What's in it for you:

- Competitive salary compensation package (based on experience & skills)
- Great benefits
- 401k
- Opportunity in a growing, forward thinking field with a progressive company

If you have what it takes to be a successful Boiler Sales Engineer, please apply now for immediate consideration!
