

Energy Savings and Heat Recovery Systems

Cole Industrial, Inc. carries a complete line of energy savings products and heat recovery systems from some of the leading manufacturers in the industry. For more information on our fine line of products, please contact us today.

CANNON BOILER WORKS

Turning wasted heat into valuable energy, Cannon manufactures flue gas economizers custom-designed for optimum heat recovery on steam boilers of 2,000 - 250,000 #/hr rating. Designed for gas, oil or coal-fired boilers or for a special waste gas stream. Can engineer metallurgical combinations for special applications with more corrosive flue gases.

PENN SEPARATOR

Manufacturer of blowdown separators, blowdown tanks, and blowdown heat recovery systems for removing water from steam and other vapors, safely handling blowdown and controlling thermal pollution. Heat recovery systems for small to large boilers can provide up to 90% heat recovery.

ERI

Manufacturers of Heat Recovery Systems, Steam Generators.
